PROFILE

Growing up I have always been wildly obsessed with video games and new technologies. This is why I decided to become a self-taught developer; from my first "Hello World" project I was hooked! I've been teaching myself numerous coding languages for the past six months, and I recently graduated from The University of South Florida's coding boot-camp where I practiced many introductory skills for full stack web development. I am seeking an opportunity to use my proven skills in web development working alongside a driven and passionate team.

EMPLOYMENT HISTORY

Lead Server , Meat Market Tampa
Tampa, FL
Dec 2019 — Oct 2020

- Collaborated with our service team to ensure all customer needs are exceeded & restaurant standards of service are maintained
- Received first place in wine sales contest that produced a 14% increase in total monthly sales
- Contributed in creating attractive front-of-house displays to market new products and draw in business

Server Trainer & Bartender , Ulele Restaurant
Tampa, FL
Sep 2015 — Dec 2019

- Consistently achieved the highest guest check averages among all servers through suggestive selling & wine sales
- Responsible for training new hires regarding fine dining service standards, menu items, & company history
- Recognized as a lead server for assisting colleagues during peak periods to foster & promote teamwork while providing an excellent guest experience

EDUCATION

Coding Certificate, University of South Florida
Saint Petersburg, FL
Jul 2020 — Sep 2020

I recently put my self-taught programming and coding knowledge to the test through a boot-camp offered by The University of South Florida. In conjunction with Revature, this three month long course furthered my knowledge in Java, Javascript, HTML, CSS, SQL, and more. This course gave me the confidence to continue to educate myself while confirming that I have the skill set needed to become a full stack developer.

Graduate, Wesley Chapel High School
Wesley Chapel, FL
Aug 2010 — May 2014
